

International Journal of Modern Engineering Research (IJMER)

Volume : 16 Issue : 3

ISSN : 2249-6645

May-June 2026

Contents :

| | |
|--|---------|
| Enhancing Website Conversions through AI-Powered Digital Sales Assistants with Humanoid Embodiment and Human-Like Voice | 01-04 |
| Study on fermentation conditions for pectinase and cellulase production by using filamentous fungi | 05-11 |
| Architectural Inefficiencies Under Non-Linear Data Processing: From Branch misprediction to Thermal Hotspots | 12-15 |
| Traffic Management Problems and Solutions in Ibom Plaza Roundabout | 16-31 |
| Mechanistic Insights into Photodegradation of the Quinolone Antibiotic Cinoxacin in the Aqueous | 32-39 |
| Solid-Supported Reagents in Organic Synthesis | 40-44 |
| Electronically tunable CCCDBA-based current-mode universal biquad circuit | 45-50 |
| Research on Conflict Prediction and Two-Way Warning Strategy Between Right-Turning Vehicles and Pedestrians at Urban Road Intersections—A Case Study of General At-Grade Intersections in Jiaozuo City | 51-59 |
| Multi-Strategy Enhancement of YOLO11s for Non-Motorized Vehicle Small-Object Detection on Vis Drone | 60-69 |
| Efficient Net-Based Deep Learning Framework for Banana Leaf Disease and Nutrient Deficiency Classification | 70-81 |
| Autonomous Smart-City Video Surveillance: An AI and Digital Twin Based Incident Detection Platform | 82-92 |
| Forecasting HKD/CNY Exchange Rate Dynamics: An Optimized ARIMA(1,1,2) Time Series Approach | 93-98 |
| Skin Cancer Detection Models Based on Swin Transformers | 99-107 |
| Novel positive current output CCCDBA-based current-mode biquadratic circuit | 108-112 |
